

system architecture

luminaire controllers

Several available form factors: NEMA, ZHAGA and compact wired controllers to be embedded into lighting poles or into luminaires right from the production line.

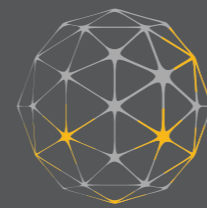

lighting panel control & monitoring unit

Installed inside the feeder pillar, it is designed to provide autonomous operation for street lighting installations and to carry out three phase measurements and analysis of electrical parameters in street lighting grids.

private or public communication infrastructure

- LoRaWAN
- LTE-M
- NB-IoT
- GSM

API for your own software, controllers or sensors

inteliLIGHT® StreetLight Control software

smart city platform integrations

- CISCO
- NOKIA
- Actility
- ENGIE livin'
- OPEN TELEKOM CLOUD
- T-Systems
- orange Live Objects
- ERICSSON
